

Quality & Environmental policy

Our number one priority is to always better satisfy our customers

We are committed to provide our customers an uncompromised quality for our products and services

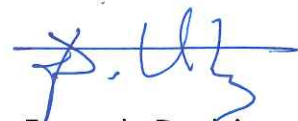

- We guarantee our products excellence through high conformity standards established from the current EC and international standards,
- We improve our products and bring services that allow our customers to be more competitive,
- We empower our employees and train them to constant improvement,
- We clearly commit to meet our promised delivery dates,
- We do what we say.

We prepare future

- We consider our customers needs, and follow technological evolutions of their market to stick and respond to their needs
- We participate to standard committees, follow evolution of standards and rules.
- We identify risks and evaluate opportunities, and take necessary measures to fulfill our commitments over time.
- We develop our competences to respond to our actual and future needs of our customers,
- We invest in research and innovation

We aim zero environmental foot print

- We invest ourselves to minimize environmental impacts of our activity.
- Eco-conception is a major concern in our developments
- We comply to all known rules
- We work to reduce our waste volumes and participate to the recycling sector,
- We share this culture with our personnel.
